

CLEAN VERSION OF AMENDED SPECIFICATION PARAGRAPH

Please amend the paragraph beginning at page 9, line 9, to read as follows:

AM
Although specific embodiments have been illustrated and described herein, it will be appreciated by those of ordinary skill in the art that any arrangement which is calculated to achieve the same purpose may be substituted for the specific embodiment shown. This application is intended to cover any adaptations or variations of the present invention. For example, signal streaming controller 114 can be implemented in software or hardware or a combination of both software and hardware. Further, modes other than the modes shown in Table 1 can be used in a specific application in order to allow a number of communication devices to cooperate in order to coordinate sink and source for a voice stream. Further, although the specification describes a mechanism that works with voice data, it is understood that other kinds of signals, e.g., video, data, or other appropriate signals, could be controlled by the same mechanism.
